Issue of microsoft/government lawsuit: 01-05-02

As a tax paying citizen I feel the time is overdue to settle the microsoft vs government lawsuit issue. I cannot comprehend the reality of the suit regarding so-called microsoft monopoly when monopolies of far greater caliber are being perpetrated by giant industries that will have a far more significant and sinister impact on people of the world. What about the creation of monopolies formed by union of various components of the medical system, pharmaceutical and petroleum giants and energy companies? What efforts are being made to control them?

Personally, if I never had a computer I could live without it. My life would not be affected! But, my life is being effected right now, and more so in the near future by cost and availability of pretroleum products, energy sources and worst of all, horrific increase in cost of medical services and medications. These industries, through costly lobbying, control the political system of the U.S. which is not in the best interest of people like me - the people who pay the bills.
